Our Earth, Our Responsibility
“The Time to Act is Now!”

Sign the Pledge

Climate change is a grave threat to our Earth. The effects of climate change are widely recognized as one of the most serious challenges facing our human family. If we stay on our current course, we can expect an increase in natural disasters, global water and food insecurity, mass migration and displacement, and threats to global health and security. The interconnected character of our Earth means that the survival of all living creatures, and all of humanity, are at risk from climate change.

I hereby affirm that our respective religious traditions call us to act together to protect the earth and its climate. Urgent and sustained action is critical. The time to act is now!

I pledge to undertake three actions for the protection of the earth through education, community engagement and advocacy.

*First Name: 

*Last Name: 

Organization (optional): 

*Your Email: 

Three concrete actions I pledge to do are:
